Course Fee

USD 350

Early Bird Offer

USD 300 until 7 April

Refund Policy

Full refund in first 7 days

Why this course is client-ready

- Live online lectures designed to complete the full Step 1 foundation in a focused 2-3 month format.
- Recorded lecture access is released after each class so students can revise, rewatch difficult topics, and catch up without losing continuity.
- Dedicated WhatsApp support groups remain active for 1 year, supervised by mentors and qualified staff.
- Student progress is monitored through scores, percentages, and performance patterns to identify weak areas early.
- NBME review and UWorld block strategy sessions are used to improve recall, clinical reasoning, and exam approach.
- Students are guided toward the real exam only when their readiness trend supports a safer attempt.

Ideal for

- Students who need structure and accountability
- Repeaters rebuilding weak basics
- Candidates struggling with NBME performance
- Students who need a clearer exam-taking strategy

Outcome target

- Complete core coverage
- Improved block review quality
- Better readiness judgment before booking/attempting the exam

What students receive inside the program

Each feature is built to improve learning speed, retention, and exam safety.

Live interactive classes Systematic teaching of high-yield concepts with mentor-led explanation, discussion, and accountability.	Recorded lectures after every class Every live session is backed by recording access for revision, reinforcement, and catch-up.
Dedicated 1-year support groups Students remain in supervised WhatsApp groups for guidance, queries, motivation, and continuity well beyond the lecture window.	Score and percentage tracking Mentors assess test performance using percentages, block trends, and weak-topic patterns instead of random guesswork.
NBME explanations Students are trained to understand why they are getting questions wrong, not just what the answer was.	UWorld block strategies Structured methods for block selection, review flow, error logging, and extracting learning value from every question set.
Weak-area correction Targeted improvement plans for poor systems, poor disciplines, low retention, timing issues, and repeated error patterns.	Green signal before exam Students are not pushed into the exam blindly; readiness is judged through trend-based mentor review.

Professional positioning note: This course is designed for serious students who want structured teaching, measured improvement, and a more responsible decision on when to sit Step 1.

Program flow, pricing, and student expectations

Phase	Approx. timing	What happens
1	Weeks 1-3	Core concept-building through live lectures with ongoing recordings and structured revision.
2	Weeks 4-6	Question integration, reinforcement of high-yield systems, and early performance review.
3	Weeks 7-10	Advanced revision, NBME discussion, UWorld block strategy, and weakness correction.
4	End phase	Mentor review of trend, confidence, and readiness before advising an exam attempt.

Fee structure

Standard full-course fee: USD 350
